

Dear Members, of the FCC Board:Re: NAB's Petition 04-160

As a citizen who has spent 26 years listening to radio stations across the US in travel, I can tell you two things for certain. One, Radio updates on traffic every 15 mins, and will focus on just ONE area of a state, not the one in which you personally have any interest. The second thing is that TV's shouldn't be in your car, Maybe it is, but it SHOULD NOT BE. I've never heard rumblings from Viacom when I turn off my MTV to go listen to the radio, they're in competing market sectors, but it's an accepted deviation that you can watch music videos on tv and listen to music in your car. Likewise I feel that given this new medium, there should be no limitations on what can be heard on a subscription based service. The FCC actually has authority over public air-waves, does this jurisdiction include a secure digitized frequency being beamed down to Only subscribers? Finally I do subscribe, I pay Money for a service, if you step in to limit what they can and cannot do, you cripple their money making capacity.

Thank-you for you time, Keep XM Alive!
Joshua Stafford
